PRYSMIC
medical emergency network

Prysmic is a medical emergency network that provides first responders with your critical, medical information, in emergency situation.

Death in the United States

Johns Hopkins University researchers estimate that medical error is now the third leading cause of death. Here's a ranking by yearly deaths.

	0	100,000	200,000	300,000	400,000	500,000	600,000
Heart disease							614,348
Cancer							591,699
Medical error			251,454				
Respiratory disease		147,101					
Accidents		136,053					
Stroke		133,103					
Alzheimer's		93,541					
Diabetes		76,488					
Flu/pneumonia		55,227					
Kidney disease		48,146					
Suicide		42,773					

Cha, Ariana Eunjung. "Researchers: Medical Errors Now Third Leading Cause of Death in United States." *Washington Post*. The Washington Post, 3 May 2016. Web. 17 May 2016.

Prysmic will revolutionize emergency care by saving, time, money, and most importantly, lives and bringing the caliber of care into the 21st century.

State of the Technology
Website launched
Database has the ability to populate information
Receiving information from the phones

State of the Business
+150 expert interviews
Research
Provisional patent application

Video

Prysmic's success will be defined by the number of patient profiles being completed and then installed on users phones. Without these profiles, there is nothing to build the network on.

Goals for the Technology
Allow for database scaleability
Implement most efficient ways to retrieve patient
information

Goals for the Business
Create meaningful IP in place
